

How To Reset My WordPress Password In PHP

Path to DB Config: wp-config.php

Path to Config: wp-config.php

Admin Login: /wp-admin/

Reset Password

1. Browse to /wp-content/cache (You might want to create a backup!)
2. Remove anything in this directory. "rm -rf *"
3. Go to phpMyAdmin
4. Select the wordpress database from the drop down box on the left.
5. Click on the wp_users table on the left.
6. Click the Browse link at the top of the screen.
7. Put a check next to the username, then click the pencil icon.
8. Delete what is in the password field. Enter the desired password.
9. Select MD5 from the drop down box in the function field.
10. Click Go at the bottom of the screen.
