

How To Add Email Services To Addon Domains

This article will assist clients who have registered their domain name with WestHost and are using the CHI Nameservers. It will help clients add email services to their Addon Domains.

- [Step 1: Navigate To The Domains Section](#)
- [Step 2: Set Up Email Services](#)

Step 1: Navigate To The Domains Section

1. Log into CHI at chi.westhost.com.
2. Select the "Domains" tab from the menu on the left hand side of your screen.
3. Select the domain you wish to add services to.

Step 2: Set Up Email Services

4. Scroll down to the third section labeled "Email". Click on "Add New Email Account".
5. Fill out the form with the appropriate account name and password.
6. Click "Save".
