

How To Connect To My Webspace

This article is for cPanel Accounts. Determine where your account is with [this guide](#).

Your webspace admin area, referred to as cPanel, is accessible as an icon from the Manage toolbar in cp.westhost.com but you can also visit it manually in your browser by visiting the URL yourdomain.com/cpanel to get connected.

Please note that your cPanel and cp.westhost.com user name and password are different from one another by default.
